

Fujitsu Storage Strategy

OSL Technologietage 2009
Berlin, 16.09.2009

About Fujitsu

- At a glance
- Portfolio and business composition
- Globalization strategy
- Our value proposition

Fujitsu Storage Strategy

- Integrated IT solutions for dynamic infrastructures
- Dynamic Storage infrastructures
- Managed Storage
- Our global Storage portfolio

About Fujitsu

Fujitsu at a glance

Headquarters:	Tokyo, Japan
President:	Kuniaki Nozoe
Established:	June 1935
Net Sales:	US\$47,888 million
R&D Expenditure:	US\$2.6 billion
Employees worldwide:	175,000 in 70 countries
Datacenters:	80 datacenters in 16 countries

Fujitsu in the region Europe, Middle East & Africa:

Employees:	35,000
R&D and Data Centers:	Germany, UK, Finland, Sweden, Denmark, Netherlands, Spain, South Africa

Fujitsu: The world's fourth largest IT services company

Note: Consolidated net sales and R&D expenditure for fiscal year ended March 31, 2009.
US\$1 = ¥98 . WW employees as of September 2008.

Products & solutions portfolio

Technology Solutions

System Platforms

- Servers (mainframe, UNIX, x86 Server, PC)
- Storage Systems
- Software (operating system, middleware)
- Optical Transmission Systems
- Mobile Phone Base Station

Services

- Consulting
- Systems Integration
- Outsourcing Services
- Network Services
- System Support Services
- System Installation/Network Construction
- Dedicated Terminal Systems & Equipment (ATMs, PoS)

Ubiquitous Product Solutions

- Personal Computers
- Mobile Phones*
- Storage Equipment (hard disk drives, magneto-optical disk drives)
- Optical Transceiver Modules
- Other Products

Device Solutions

- Logic LSI Devices (system LSI, ASICs, microcontrollers, FRAM-embedded I/O)
- System Memory Devices (flash memory, FCRAM)
- Semiconductor Packages
- SAW Devices
- Other Electronic Components

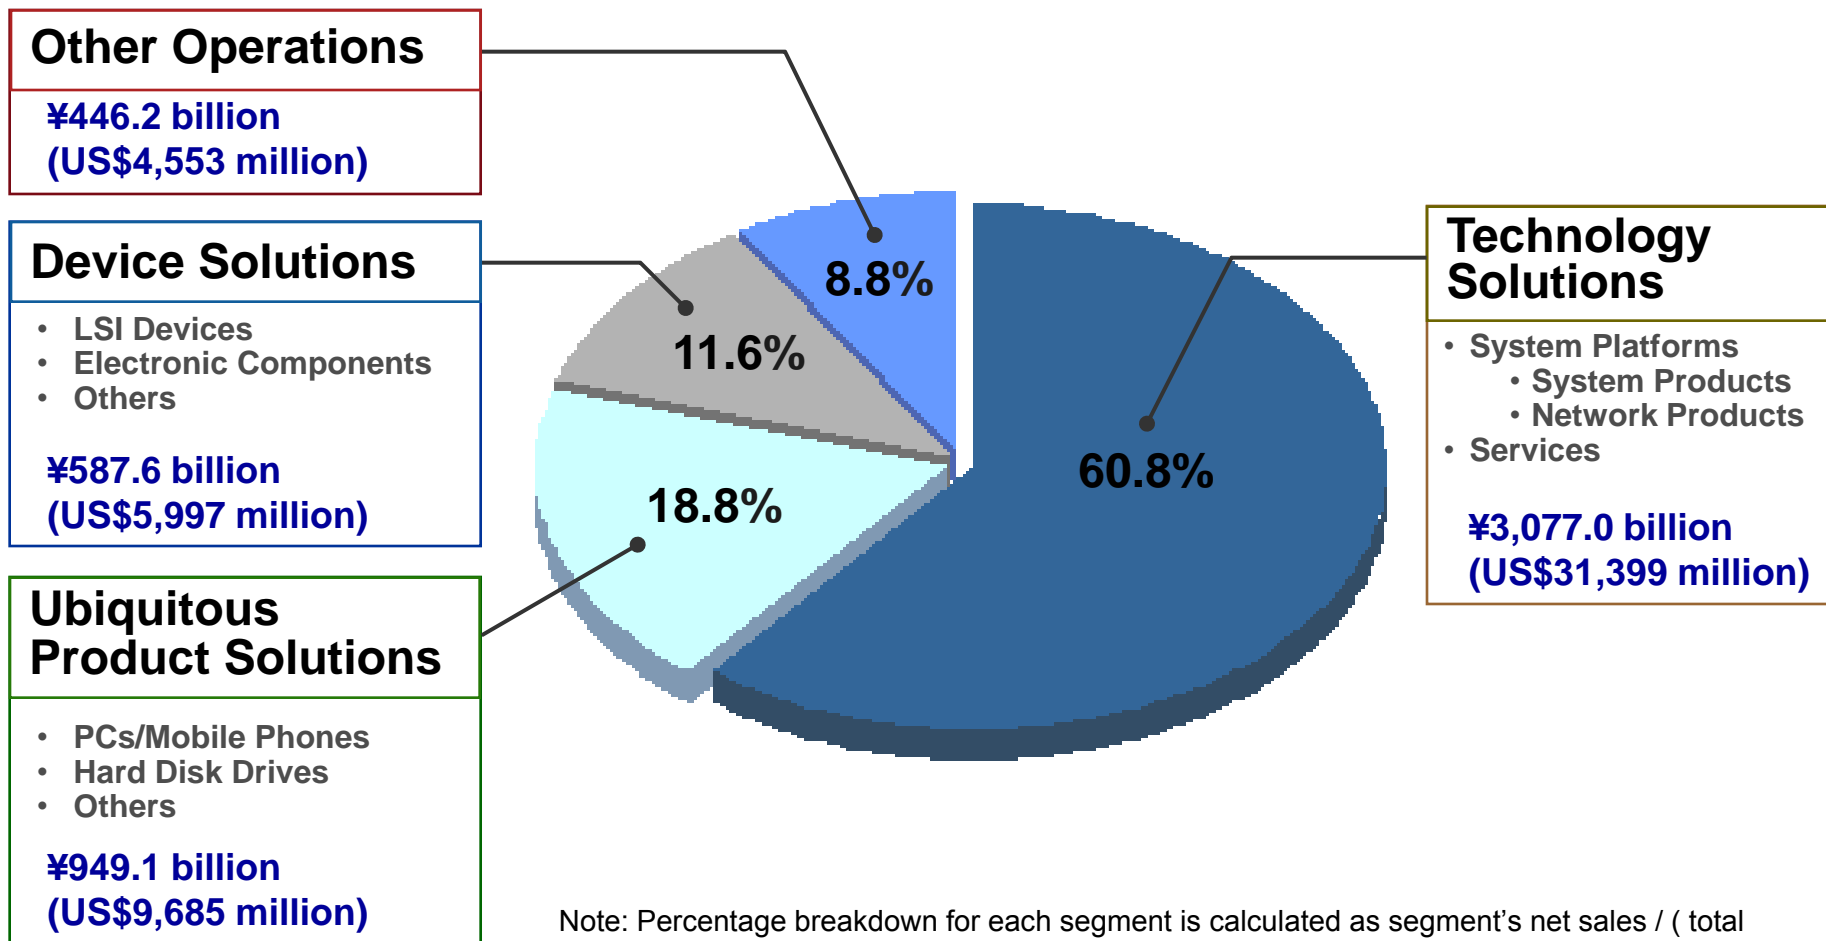

Note: *Japan market only

Focus on technology solutions

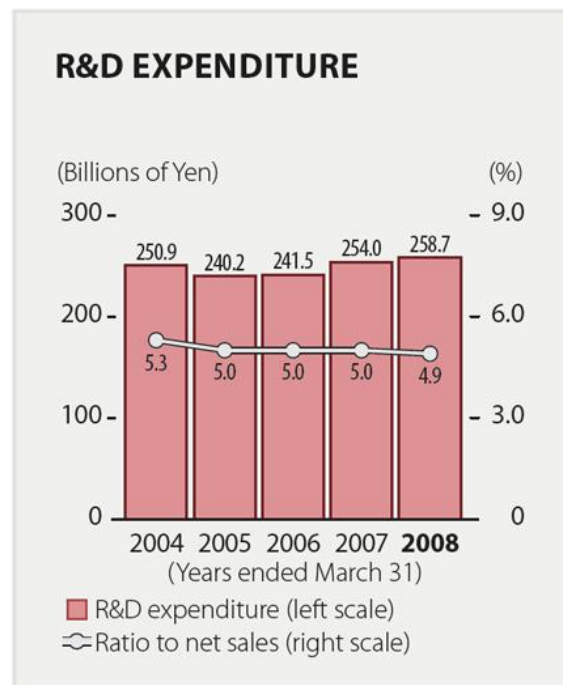

FY 2008 Revenue by Business Segment

Consolidated Net Sales by Business Segment, Including Intersegment Sales

Strong investment

- Fujitsu invested US\$ 2.6 billion for R&D in FY08
- 1,500 research scientists and 14,000 development engineers worldwide
- Laboratories in Japan, US, Europe, China and Germany
- Award-winning research with over 34,000 patents
- Collaboration with leading independent research institutes

Palm vein technology – unique biometric authentication technology

Robot project: HOAP Series – neural network-powered robots

Business Information navigation technology

E-paper

Key research goals and themes

- Organic and grid computing
- High-density data storage
- Next-generation web services
- Photonic and wireless networks
- Bioinformatics, biometrics and other security technologies
- Environmental technology

“Fully integrating Fujitsu Siemens Computers into the Fujitsu Group fits perfectly into our global growth strategy.”

Kuniaki Nozoe, President of Fujitsu

Fujitsu's global growth strategy focuses on

Field Innovation:

Improve the customer's business, not just the IT business

Global Expansion:

Shift the focus from Japan to global business

Environmental Contributions:

Preserve the environment for future generations.

Fujitsu Technology Solutions: A catalyst for Fujitsu's global growth strategy

FTS is a catalyst for Fujitsu's transformation and global growth strategy

- Developing business outside Japan
- Delivering profit and growth through the services business
- Developing innovative products through the hardware business

Fujitsu and FTS will create new synergies

- Expanded scope of product and service offerings
- Integrated products and services
- Delivered globally

Close to your business: Global responsibility for technology solutions business centralized in Europe

- PRIMERGY x86 server business
- Storage business under the ETERNUS brand
- Fujitsu invests in R&D centers in Munich, Augsburg & Paderborn

Your benefits:

- Globally unified portfolio
- Close to our customers and their needs
- Short response times and direct contact to R&D
- Better time to market through consolidated manufacturing in Europe
- Strengthening cooperation with our storage partners NetApp and EMC

Think global, act local

Supporting your business where you need it!

Local presence: Business responsibilities in transnational regions and in the countries

- Sales, Services and Marketing close to our customers provides an offering tailored to regional needs
- Integrated FTS and Fujitsu Services organizations in Europe: One face to the customer
- Build complementary know-how on regional basis to support our customers' business across EMEA
- Fast decision making and short response times to our customer needs

Global scale: Global delivery of FTS products

- 175,000 employees worldwide and sales and service operations in more than 70 countries ensure optimum support for global IT projects
- 80 datacenters in 16 countries for seamless global services delivery

Fujitsu Storage Strategy

Q1 2009 Enterprise VAR survey

„Storage continues to be seen as the strongest category for IT spending in 2009, in line with previous surveys.

... Within storage, customers looking to cut costs by maximizing resource utilization through technological innovation (i.e. virtualization and data deduplication)”

Baird, Computer Hardware & Storage Research, April 2009

IDC annual holistic view of the Western European Storage market 2008-2012

- Storage software and services markets are still forecast to grow, as storage capacity continues to increase, driving the need for software and services to deal with the complexities of growing storage environments
- Server virtualization moving into the mainstream is a major driver for continued storage investment even in tough economic times

IDC, Feb 2009

Dynamic Storage Infrastructures

Business needs

Requirements to the IT infrastructure

- 
- Integrating the value chain with new suppliers, partners, and customers
 - Business processes and applications must respond to new demands

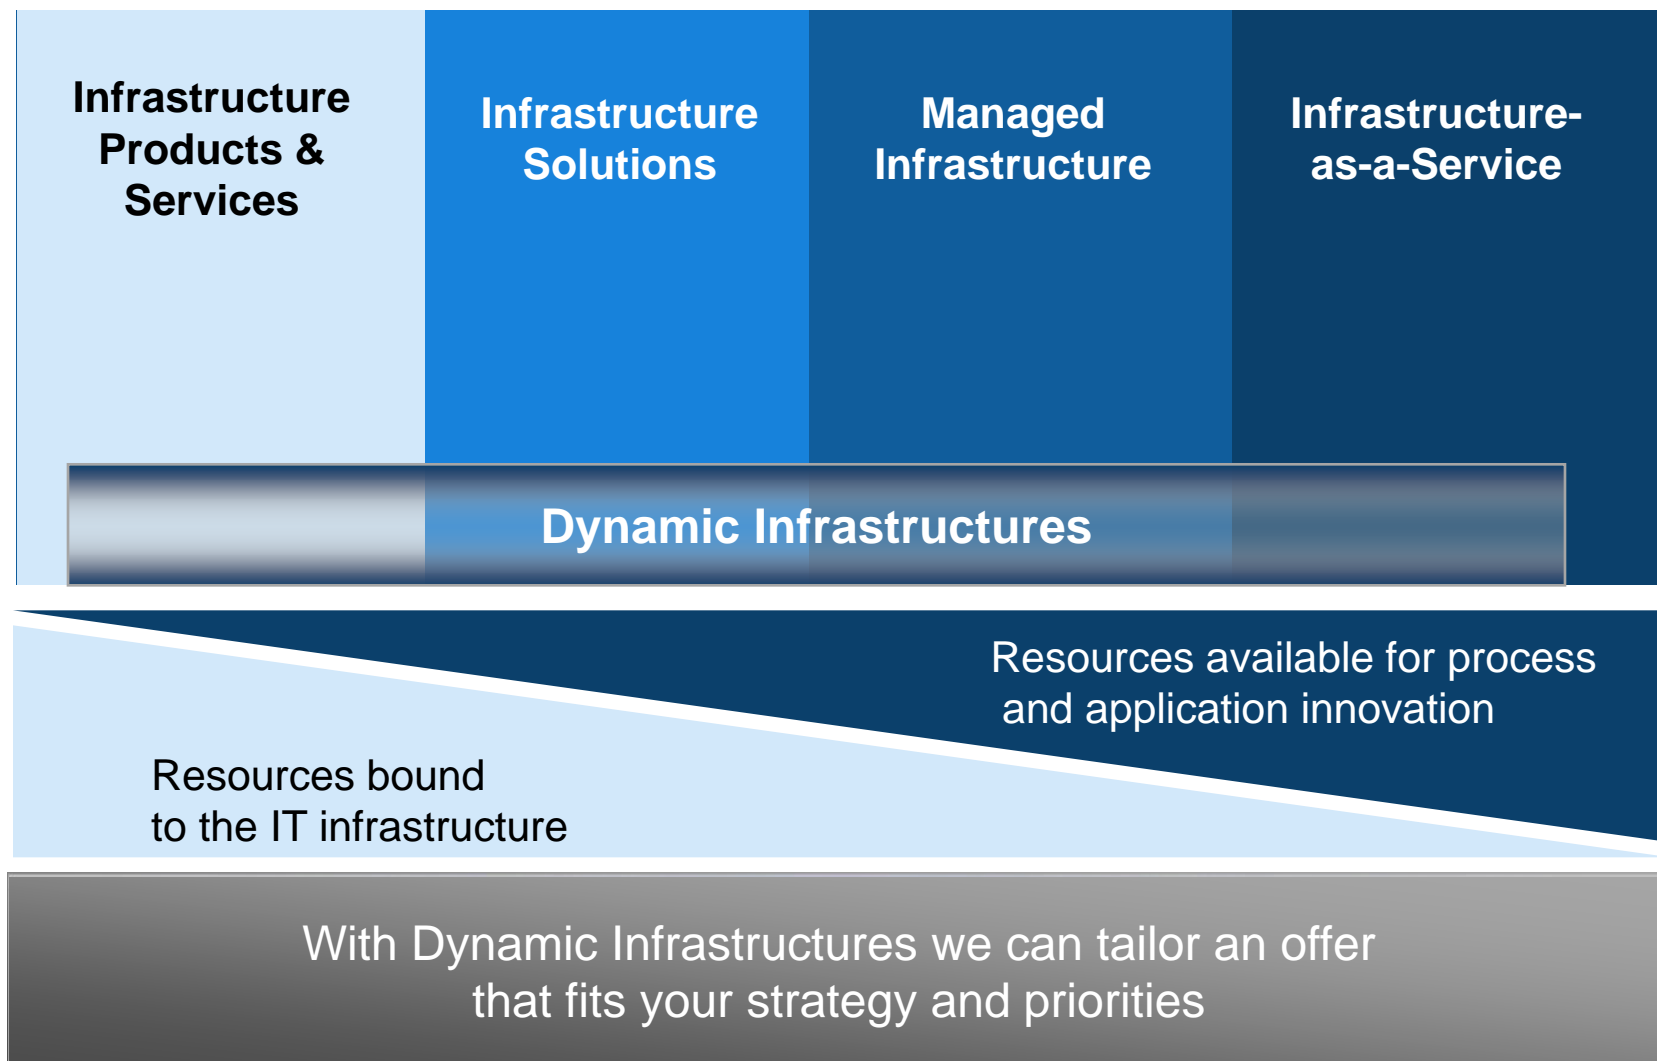

**Need for
dynamic data center
infrastructures**

- The same workforce must achieve more
- Roles and responsibilities of people constantly change

**Need for
dynamic client
infrastructures**

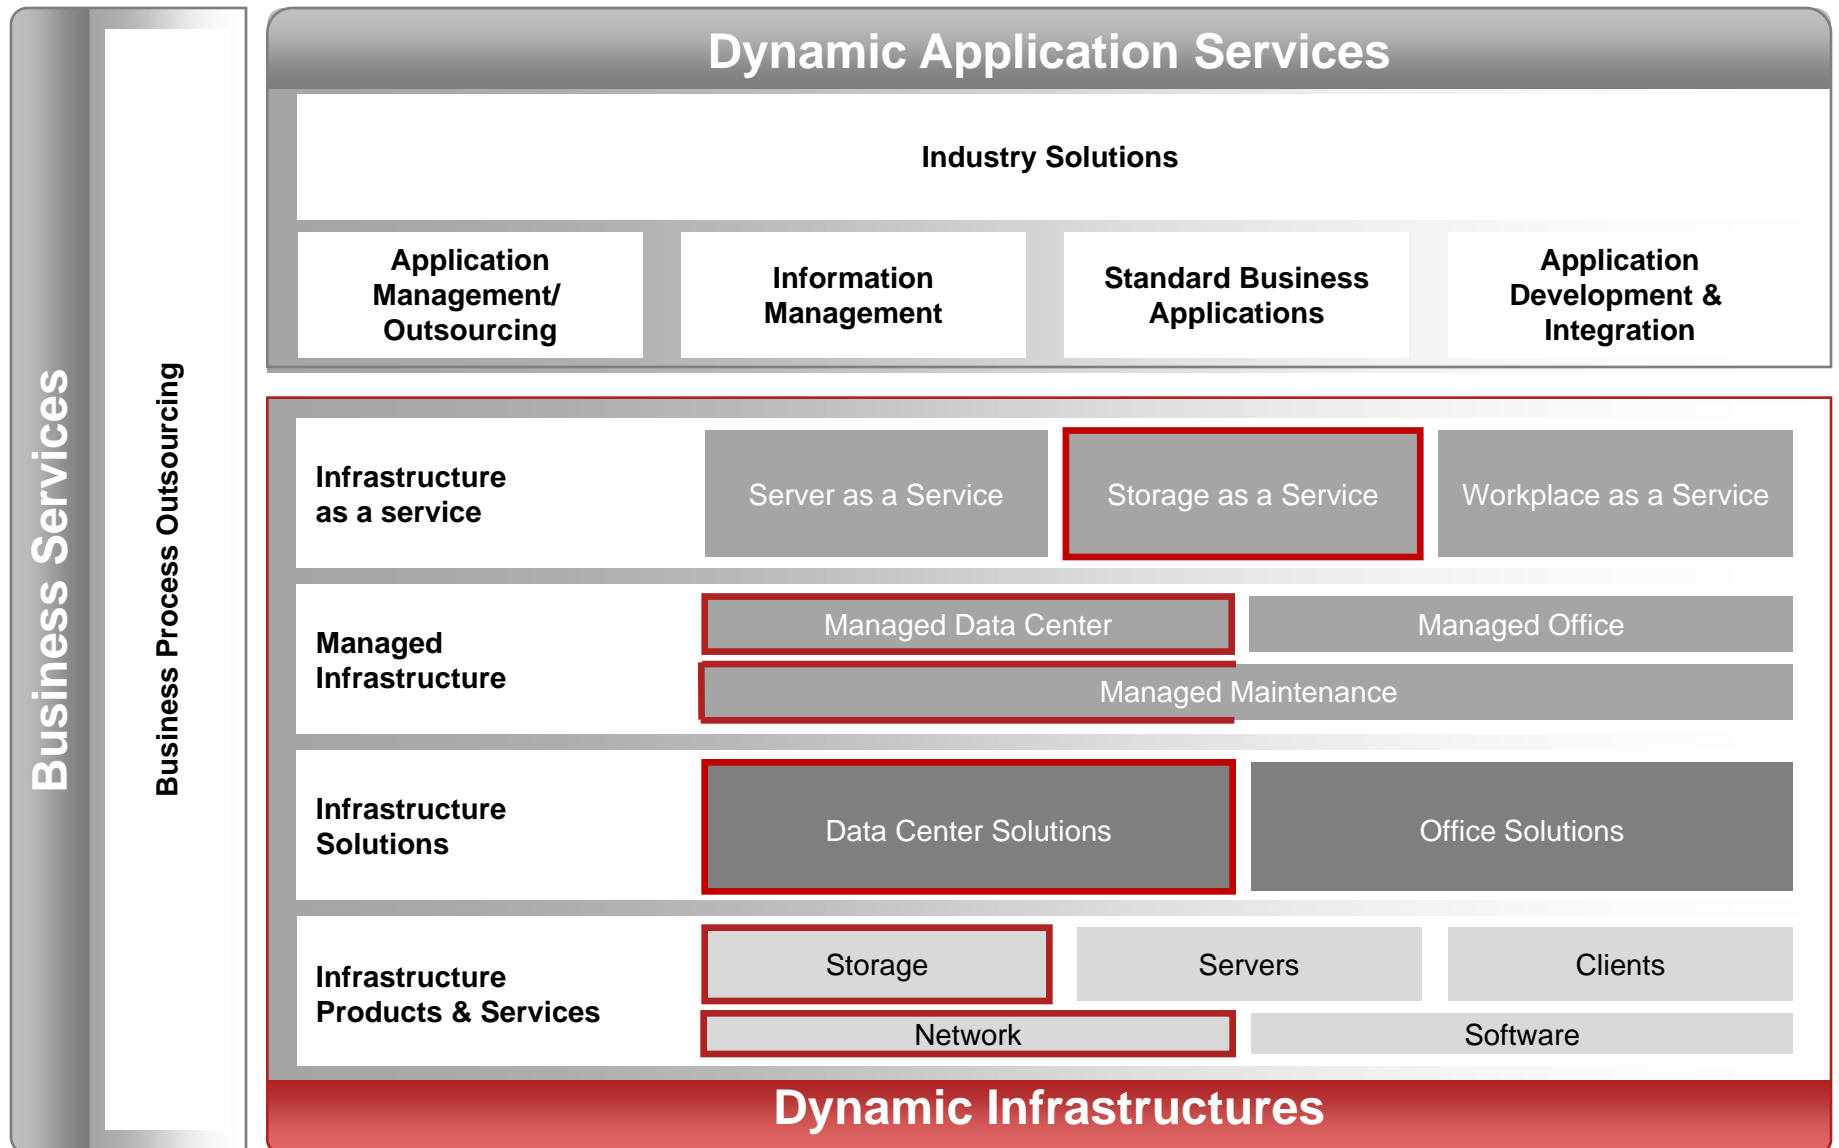

Dynamic Infrastructures

Our Dynamic Infrastructures are tailor-made to your questions

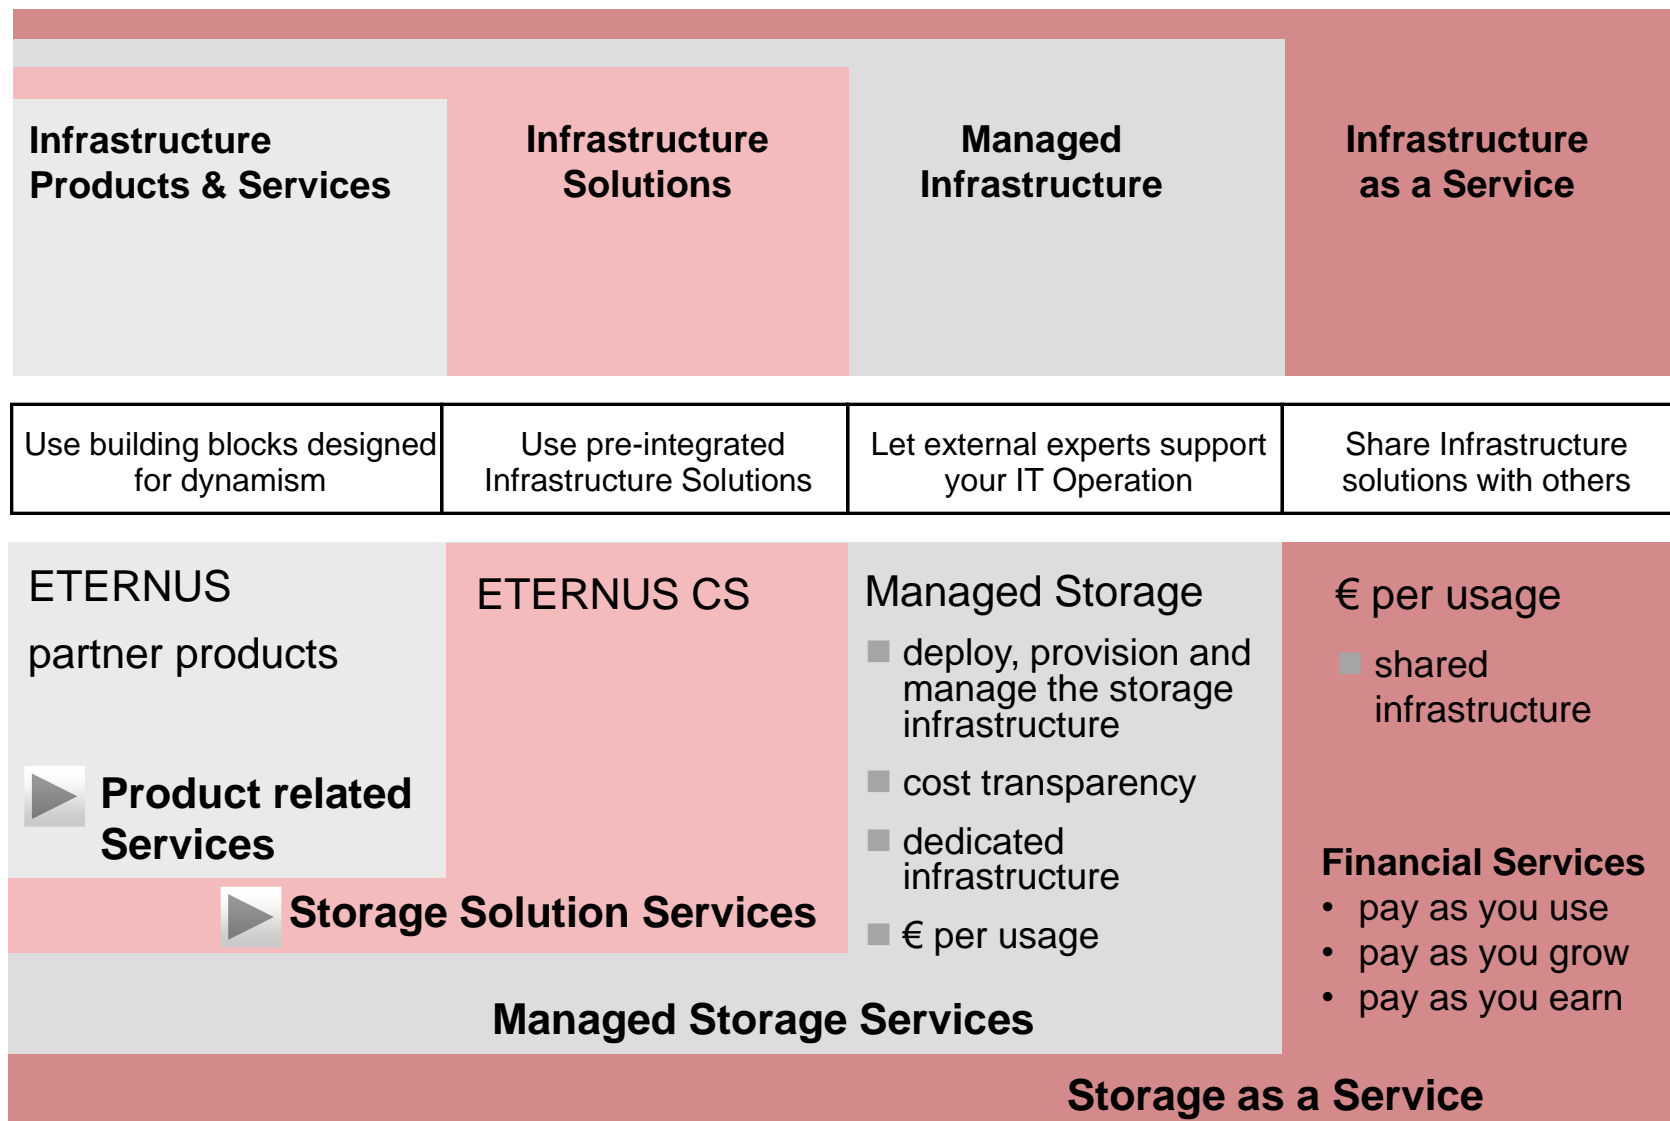

Infrastructure as a Service	Run your applications on a shared environment	Cut your IT costs down leveraging economies of scale by accessing a centrally shared infrastructure.
Managed Infrastructure	Delegate the responsibility to run your IT	Utilize our expert support services for the operation of your dynamic infrastructure
Infrastructure Solutions	Use pre-tested Infrastructure Solutions	Benefit from evaluation and integration experience out of many projects
Infrastructure Products & Services	Use building blocks designed for dynamism	Products and services designed for virtualized and automated environments

Dynamic Infrastructures

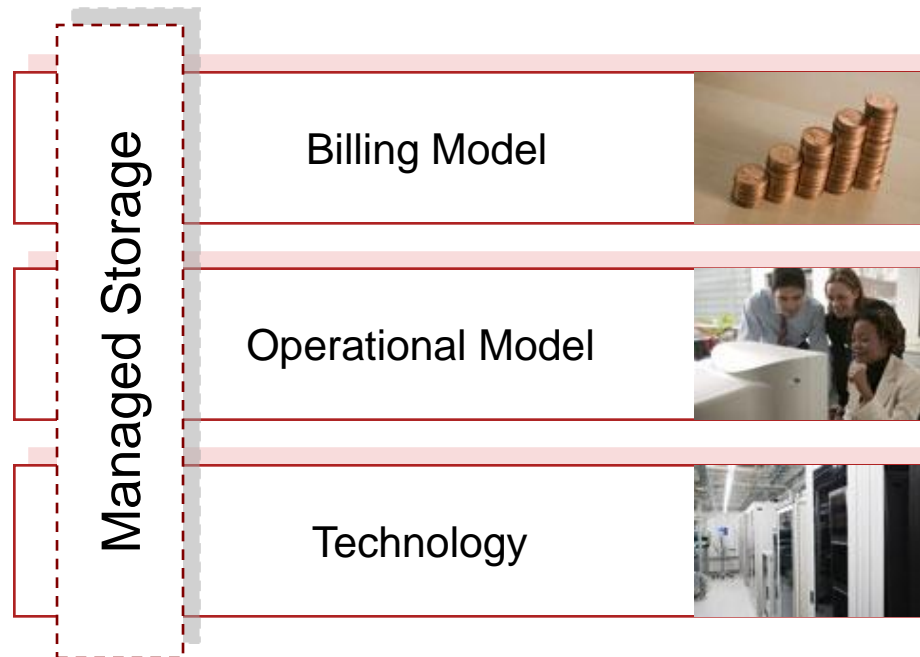

Dynamic Storage Infrastructures

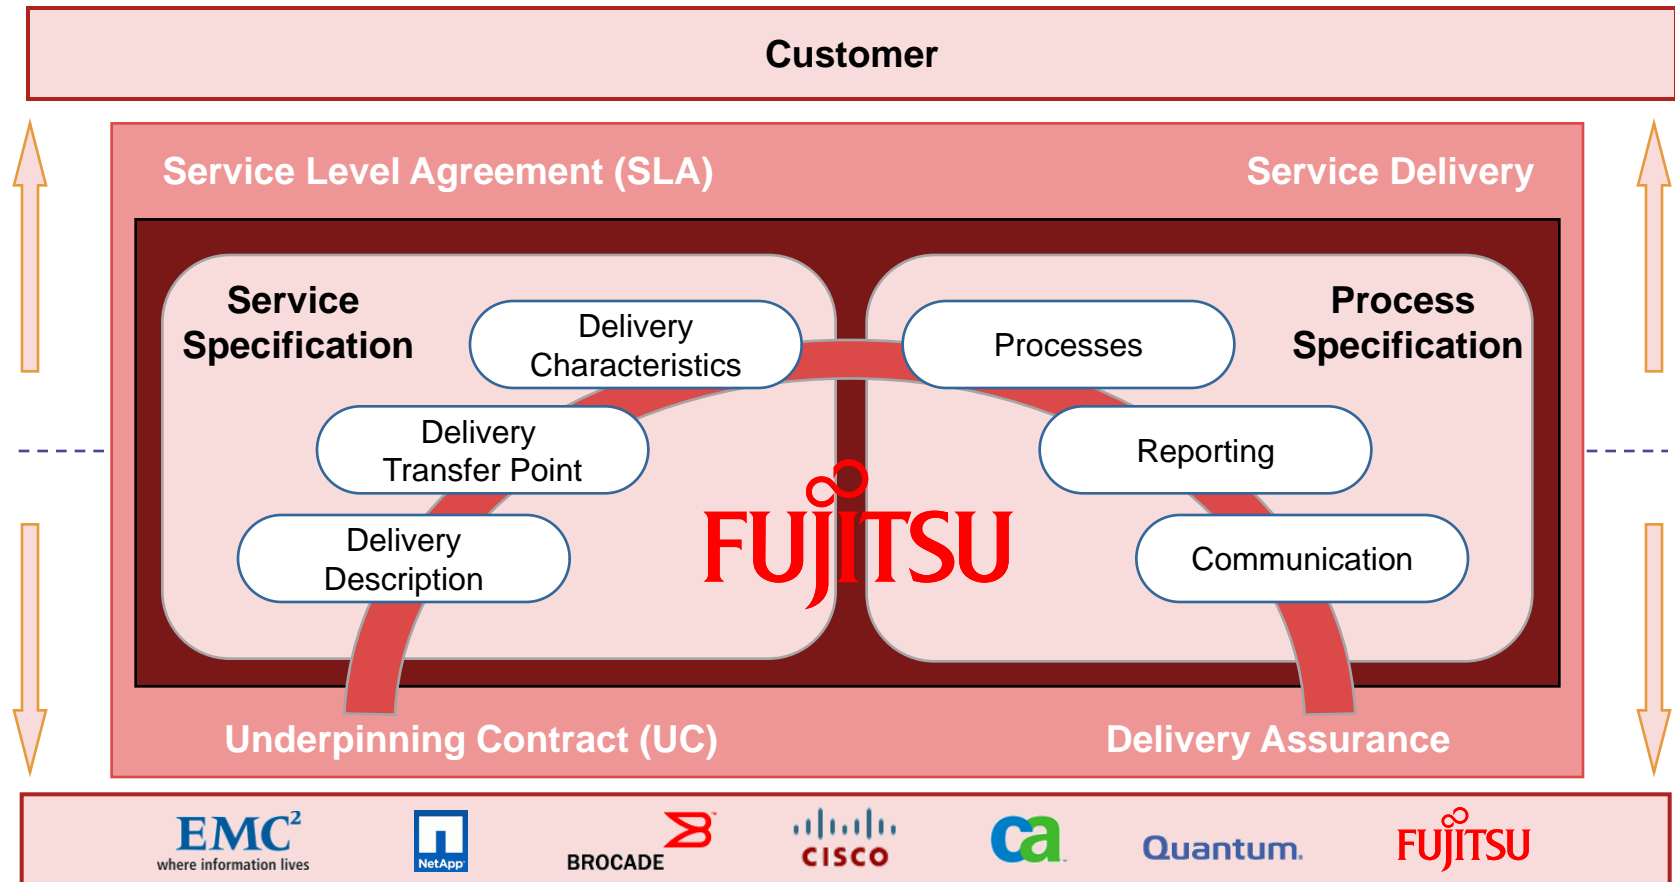

Managed Storage = Deploy, provision and manage online + backup storage, infrastructure on a €/GB basis with defined SLAs

Managed Storage embraces 3 central elements:

„Receiving only one invoice and one report a month!“

Managed Storage: Setup of services

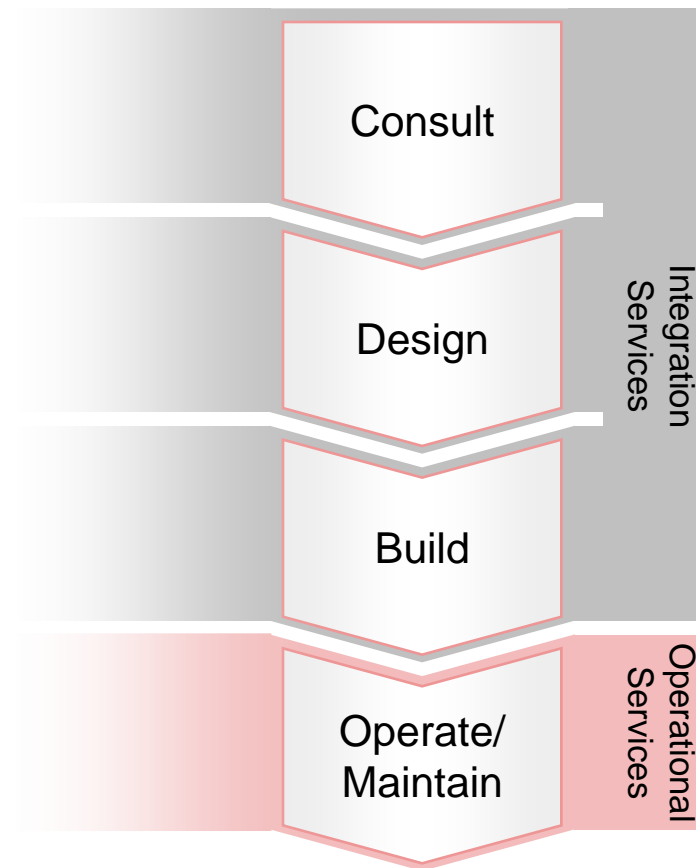

Managed Storage Services Portfolio

Comprehensive and objective consulting
services to identify your specific storage needs

A storage concept
that is tailor-made to your requirements

Successful transfer
of your storage infrastructure into regular operation

24/7 proactive management
and maintenance of the storage infrastructure

Get the most of your investment: The integration and consulting knowledge of Fujitsu Technology Solutions guarantees a smooth project execution.

Centralized approach

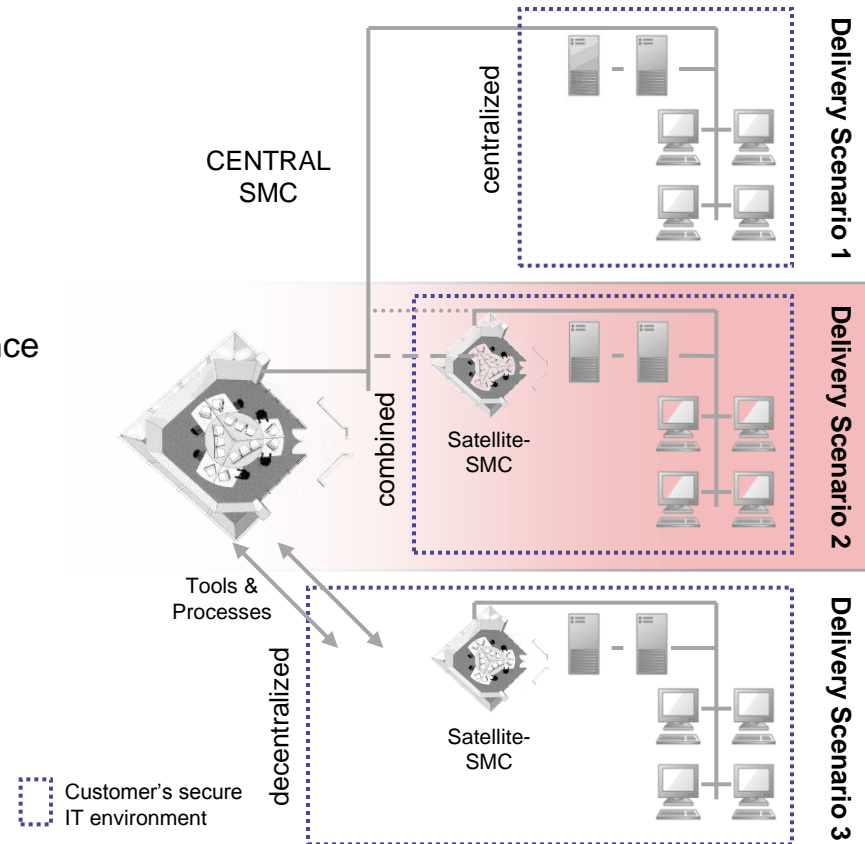

- Customer allows full remote access to all IT-infrastructure components
- Complete SMC portfolio is delivered centrally

Combined approach

- Limited access to IT-infrastructure and/or onsite presence
- Satellite SMC installed on site – full access to central SMC capabilities (e.g. back level support)
- Central SMC provides services for dedicated IT-Infrastructure directly (remote)

Decentralized approach

- Customer allows no remote access
- SMC needs to be set up fully decentralized on site
- Central SMC acts as process and tool owner and 3rd level support for decentralized SMC

Flexibility

- System and Service availability according to growth plan and project specific demand
- No over-capacities
- Growth per work order
- Predefined buffered capacities

Efficiency

- Freeing up expert capacity for core competencies
- Access to certified professionals and experts
- Overall system consolidation
- Acceleration of procurement processes and efficiency in system utilization

Improved Return on Equity as assets
are no longer part of the balance sheet

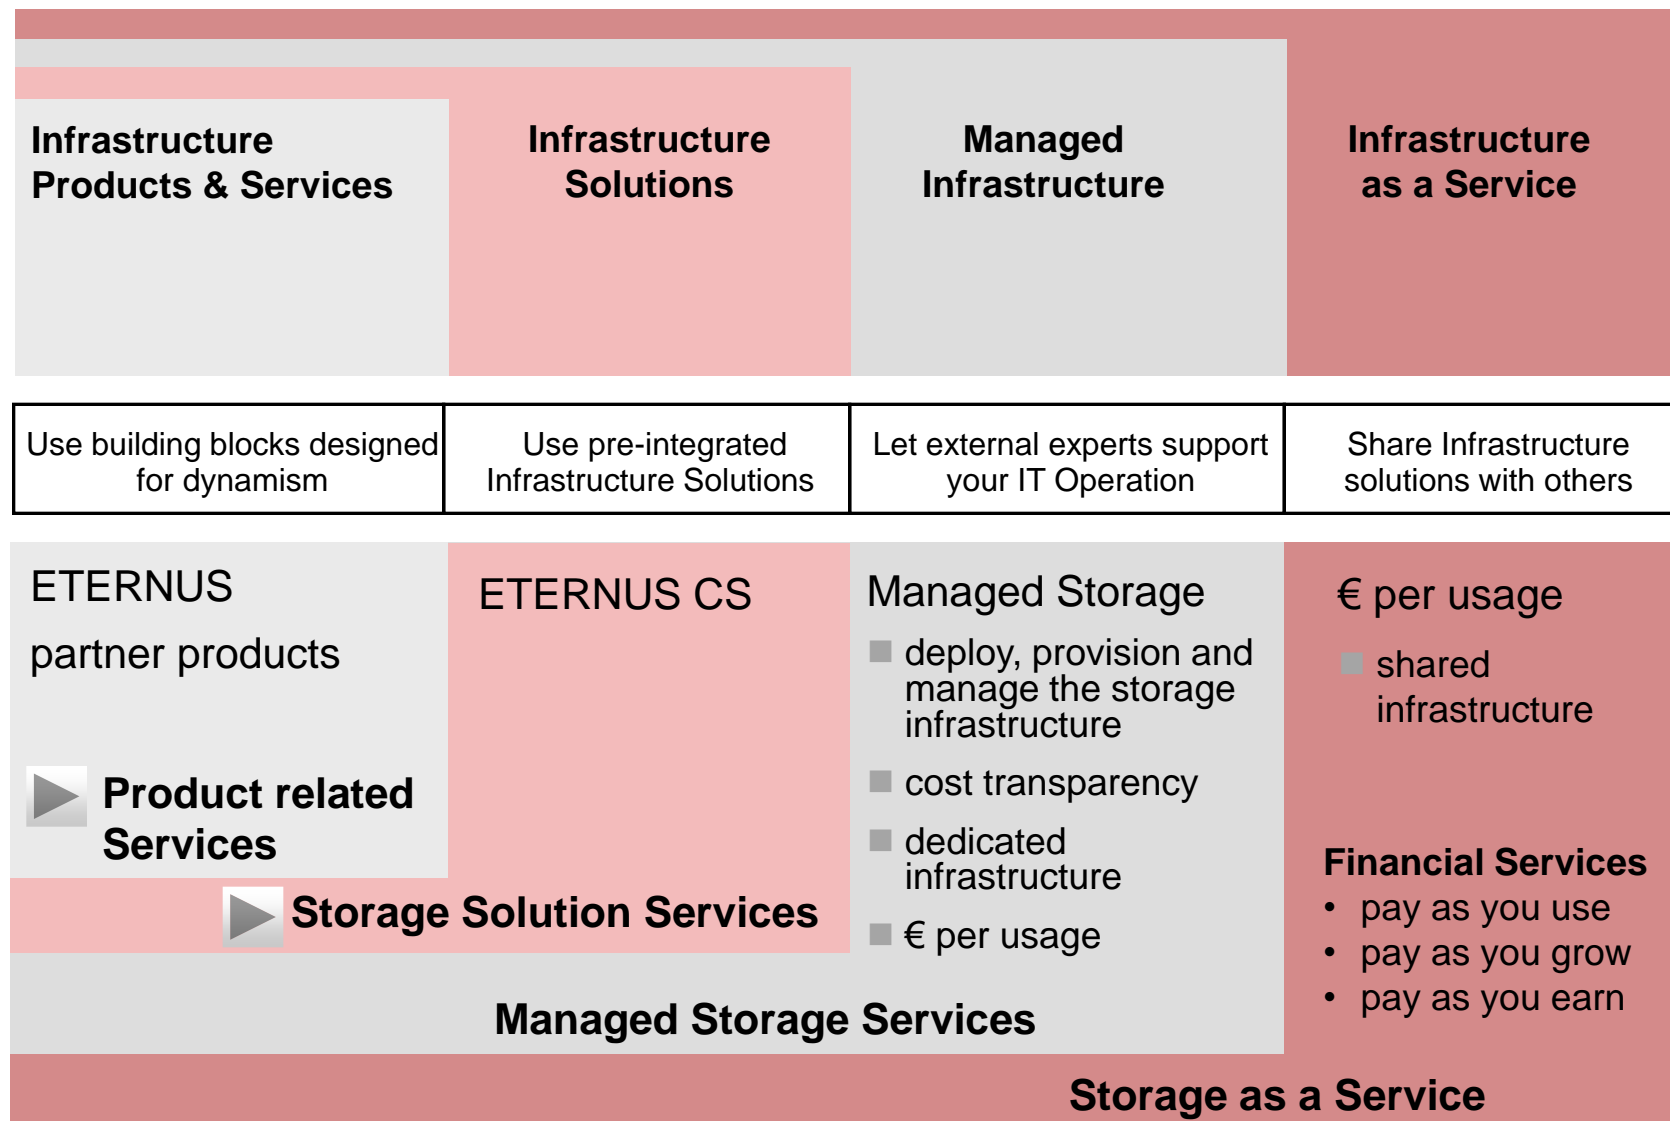

Transparency

- Online Storage and Backup as a service – not as a technology
 - SLAs supporting business requirements
 - Defined interfaces and operation processes, implementation of standardized Service Levels
 - Monitoring and reporting of resources and services
 - Tailor-made billing modules enable efficient cost accounting
- ➔ Just one report and one invoice

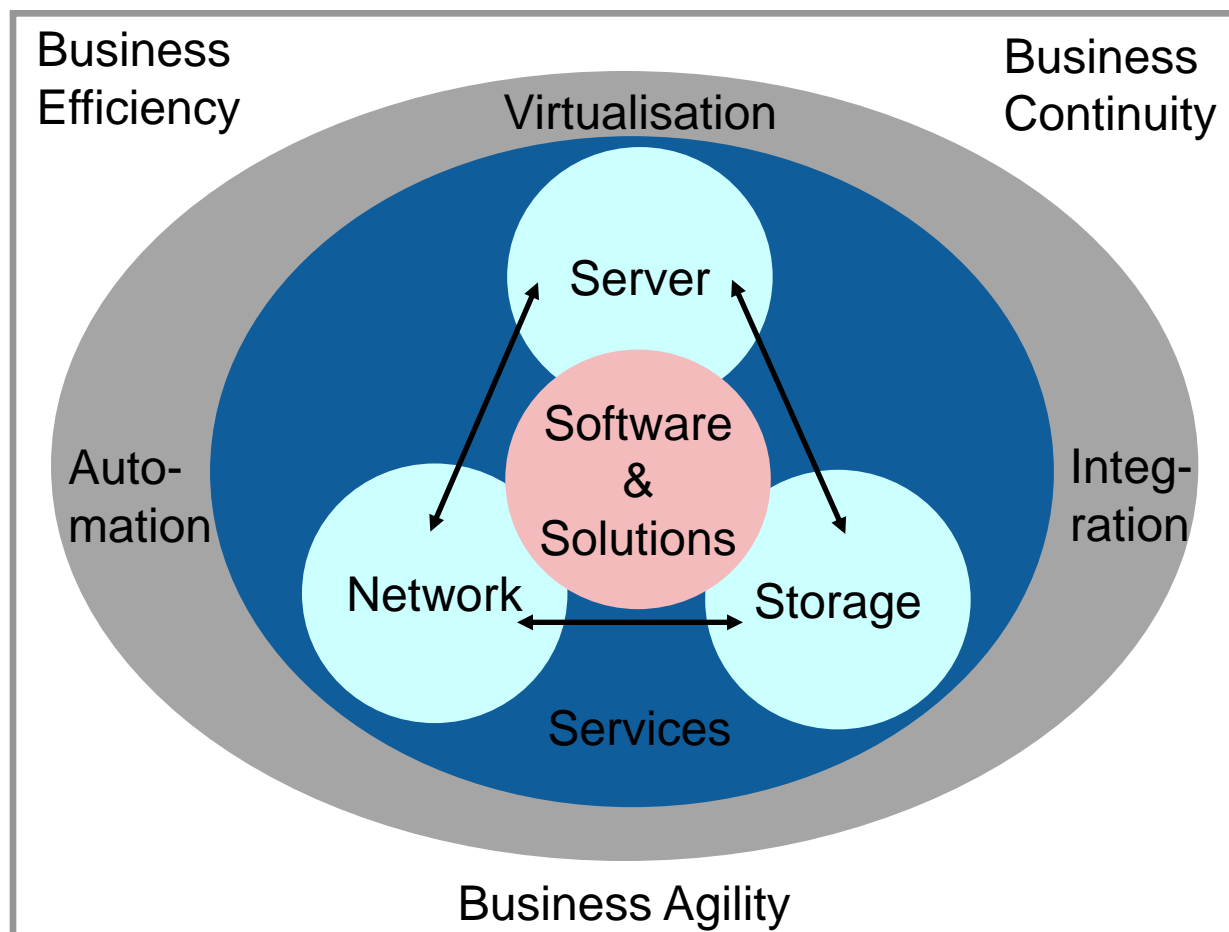

Cost Transparency through precise planning of backup costs, early anticipation of future capacity requirements and "pay-as-you-grow" concepts

Dynamic Storage Infrastructures

Fujitsu storage solution approach

Our global storage portfolio
Our partner strategy

- Storage is an important part of our Dynamic Infrastructures Strategy
- Customers increasingly expect their server, storage and networking infrastructure to deliver value as a whole, not as islands
- Strong storage partners help us to complete the portfolio and support us in market access
- High performance IP (internet protocol) drives convergence of the data center

Our storage solutions approach

- We provide superior storage solutions based on partners' and own best-in-class products and integrate with our servers - also addressing our customers' multivendor environments
- We create strategic alliances with the suppliers of selected BiC products
- We integrate the selected products to prepackaged storage solutions
- We build up the regional ability to deliver fully customized solutions to our customers
- We deliver professional services to optimize technology within IT-solutions

Our partner strategy

On combination with partner products we cover the full range.

Entry Storage products of FUJITSU...

...meet storage requirements of small and midrange customers

- Are leading in terms of speed and capacity: up to 120 TB capacity
- High levels of reliability:
- CacheProtector, RAID Level, Redundant Copy, 1024 Snapshots, Encryption
- Are affordable
- Are simple to set up and operate : easy-to-use GUI
- Work fast and reliably over distances: 1st A-vendor with 8 Gb/s FC
- Support compliance requirements: ETERNUS LT20/LT40/LT60
- Store data in an energy efficient way:
Enhanced EcoMode, tapes vs. disks

This value proposition is true for ...

... Storage Entry Products

ETERNUS DX60 and DX80 – Line-up

Optimized storage for Small & Medium Enterprise business

Affordable entry
in network storage

Max. 24 drives

ETERNUS DX60

ETERNUS DX80

Max. 120 drives
Supports FC 8Gbps

For higher performance
and more expandability

	DX60	DX80	Note
No. of drives	24	120	
Storage capacity	10.8 TB	54.0 TB	With 450 GB SAS drives
	24.0 TB	120.0 TB	With 1 TB Nearline SAS drives
Cache capacity	2 GB	4 GB	In configurations with two controllers
Host ports	4x FC 4 Gb/s	4x FC 4 Gb/s or 8 Gb/s	+ SAS + iSCSI as of 09/2009

ETERNUS DX60/80 – reliable storage

ETERNUS DX60

- Up to 24 disks
- 24 TB (NearLine SAS)
 - 4 Gb/s FC
 - 2 GB cache
- RAID 0, 1, 1+0, 5, 5+0, 6 support
- 64 connectable hosts
(Windows, Solaris, Linux, VMware)

ETERNUS DX80

- up to 120 disk
- 120 TB (NL SA)
 - 8 Gb/s FC
 - 4 GB cache
- RAID 0, 1, 1+0, 5, 5+0, 6 support
- 128 connectable hosts
(Windows, Solaris, Linux, VMware)

Outstanding Benefits

- CacheProtector
- Redundant Copy
- Data block guard
- RAID migration
- EcoMode (MAID)
- Disk Encryption
- Nearline SAS and SAS drives

ETERNUS LT family

LTO Ultrium technology

- high capacity and performance
- LTO Ultrium Tape Drive (Desktop)
- 1U LTO autoloader ETERNUS LT20
- 2U LTO tape library ETERNUS LT40
- 4U LTO tape library ETERNUS LT60

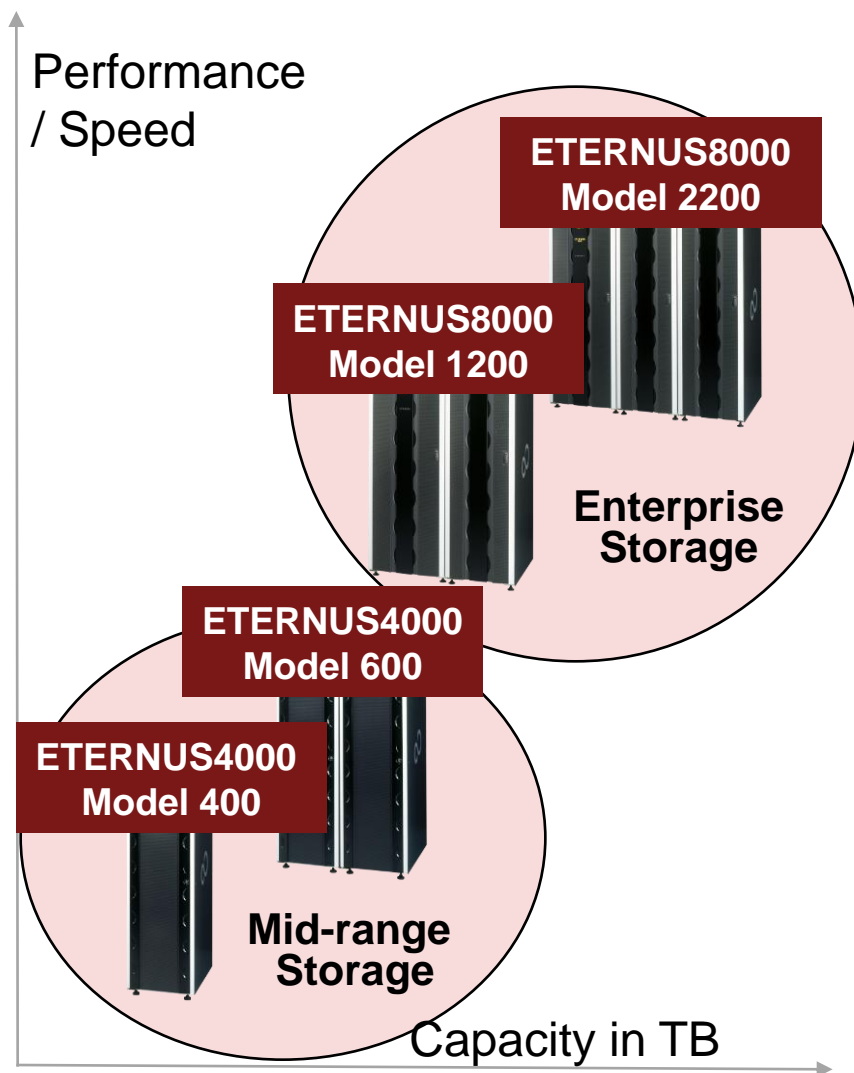

Desktop device

entry level automation

Magnetic Tape Systems for all Requirements

ETERNUS4000 / ETERNUS8000 models

- **Quality and reliability**
 - proven HW + SW
 - RAID migration
 - Storage based data encryption
 - Redundant copy
- **Innovation, scalability and speed**
 - Reduce cost with high efficient storage systems
 - Ideal platform for extensive and massive storage consolidation
 - EcoMode with MAID functionality
- **Versatility**
 - Suitable for a large range of applications

“Only invest in tested storage solutions from a single source”

THE POSSIBILITIES ARE INFINITE
